# VANDERBILT

# Migration of existing SISTORE MX

# installations to Vectis iX

**vanderbiltindustries.com**

After 20 years of success and more than 35,000 installations, the SISTORE MX has reached its end-of-life. With the Vectis iX family, that successfully launched in the spring of 2015, Vanderbilt offers a perfect and ideal migration solution for existing SISTORE MX installations.

## 10 reasons for migrating to Vectis iX:

1. Vectis iX requires only half the storage capacity as SISTORE MX with the same recording quality

2. Independent IP-camera compatibility via ONVIF and complete integration of all well-known camera manufacturers

3. Interoperability with SiPass Integrated and other systems

4. UVV-Kassen approval (German Bank approval)

5. Live video and search is possible with Vectis iX CMS Management software

6. Mobile App via iPhone and Android smartphones and tablets

7. Integration of encoders (CNE) for connecting analog cameras to Vectis iX, allowing a step-by-step migration

8. Dual-monitor and full HD real-time display

9. Display on 4 monitors with management software (CMS)

10. Redundancy solutions with RAID5

### Would you like to find out more about our migration solution?

We will be happy to support and answer all open questions. Please visit our website
