## SiPass integrated

Flexible & Scalable Security Management

[vanderbiltindustries.com](http://vanderbiltindustries.com)

## SiPass integrated: freedom of movement in a secure environment

SiPass® integrated is a powerful, scalable and very flexible access control system that provides a high level of security without compromising convenience. SiPass can also be used to integrate access control, intrusion detection and video surveillance into a single interoperable system.

## Flexible and highly secure

SiPass integrated\* is a powerful open access control management software, scaling from small to large complex deployments. The SiPass integrated portfolio has 5 different scaling packages, addressing the specific needs of small and medium size businesses up to large complex deployments, and can be expanded to fit your organizational requirements.

## Customizable functionality

SiPass integrated is particularly useful in environments where information is highly sensitive and concerns about potential espionage exist. Standardized interfaces enable easy integration with existing security processes and business systems. A wide variety of software extensions can be used to customize the system to meet any organization's specific needs.

## Interoperability & integration with third-party systems

As well as providing top-of-the-line access control functionality, SiPass integrated supports the integration of video surveillance and intrusion detection systems to meet any organization's specific needs.

(\* A product made by Siemens AG)

## High level communication between SiPass integrated and SPC

The synergies between SiPass integrated and SPC put all the power of a fully interoperable security management system in the palm of your hand. With the high level communication between SiPass integrated and SPC it is easier than ever to keep people, property and processes safe, today and tomorrow.

## Highlights

- ✔ Modular system architecture enables tailoring to suit the needs of any facility
- ✔ Advanced identity management via biometric integration and DESFire encoding
- ✔ Customized security control via Advanced Security Programming (ASP) feature

- ✔ Intuitively designed software that is easy to use and administer
- ✔ State-of-the-art interactive reporting
- ✔ Support for Salto offline components
- ✔ Operates in an existing IT environment using TCP/IP over WAN/LAN

## SiPass integrated system architecture

### SiPass integrated

- ✓ Can **easily integrate** a wide variety of 3rd party applications and hardware
- ✓ Graphical user interface for **easy operation** and operational rich client for professional **maintenance**
- ✓ The system supports **large numbers** of **cardholders** and **doors** as well as **deep customization options**
- ✓ Can be included as a core component of any building environment providing **interoperability** with other systems
