Dear ACT365 User,

We intend to release a performance improvement to the ACT365 service on the morning of 11 March which may cause some minor disruption to the service.

In this version of the ACT365 Portal, you will see improved performance. We have included in this release some minor Bug Fixes to the Audit Events Page. The changes allow for quicker loading of the Audit Events displaying 5000 Audit Events. To display events past 5000, click the last page option circled in the below image.
