The release of ACT365 Software version 1.7.10 will take place on 25 November 2021 between approximately 6.00 a.m. GMT to 8.00 a.m. GMT. The release coincides with the release of Firmware version 1.03.10 at the same time.

Software Feature releases: See [Attached Software Technical Note.](#)

1. [ACT365 Muster Report- Building Configuration.](#)
2. [Send Pin Code by Email to Cardholders.](#)
3. [Bug Fixes](#)

1. [Muster Building Configuration.](#)

ACT365 now facilitates configuring Muster Buildings for scenarios where a customer has a site with multiple buildings located within it. The new building muster report allows for more accuracy for the card holder's location for the purpose of Health and Safety reasons. You can define buildings to split your site into different areas. Enter the building name, choose a door group with all fire doors for the building, and another door group to represent the perimeter doors of the building. These settings override the general fire and perimeter door settings.

2. [Send Pin by Email.](#)

ACT365 now facilitates sending Pin Codes to Cardholder via email, allowing for remote access capabilities in unmanned locations. Please see attached Software Technote for further information.

3. [Bug Fixes](#)

- a. Fix for Longitude and Latitude fields with regards dots in certain languages.

Firmware Feature Release.

1. [FW 1.03.10 bug fixes](#)

Following the release of FW version 1.03.09. ACT365 now releases 1.03.10 addressing bugs. Please see attached [FW Technical Note.](#)
