ACT Enterprise version 2.12 is now available.

The following is a list of new features and improvements included with ACT Enterprise 2.12. Some features require the associated controller firmware version 1.10.14. This is shipped with the ACT Enterprise installation package.

Please note: The ACTpro-100 door station cannot be firmware updated.

IMPORTANT NOTE: Integration with Kone elevators is not available in this version and will be reinstated in the next major release.

ACT Enterprise 2.12 Features:

- Contact traceability report
- Option to force Card and PIN operation when arming/disarming
- Report status when an intruder alarm is successfully armed
- Support up to 96 elevator floors with IO Module
- Allow DNS name and NetBIOS name as the controller IP address
- Display of Bluetooth and Biometric licenses status
- Add internal door events to the rules engine
- Import user photographs in multiple formats
- Random Challenge Events added
- Bug fixes.

For more detailed information regarding these new features, please refer to the **ACT Enterprise 2.12 release notes**.
