Welcome to Vanderbilt...

An introduction from the Managing Director

I'd like to warmly welcome you to this new era in security. Prior to our acquisition of Security Products from Siemens in June 2015, you might not have heard of Vanderbilt. If that was the case, let me give you a few facts about who we are and what we do.

Joseph Grillo Managing Director

Headquartered in Wiesbaden, Germany, Vanderbilt is a global leader in creating state-of-the-art security systems. Our legacy is built from nearly three decades in the industry, and we have gained an enviable reputation for designing, manufacturing and distributing systems that make premises of all sizes safe, secure and easy to maintain.

Active in 95 countries worldwide, we supply and support in excess of 9,000 customers with a portfolio comprising over 2,000 products. Our entire range benefits from continued investment in the latest editions of relevant regional standards, thereby guaranteeing compliance, quality and reliability. Put simply, we're the only independent global business operating at this level and we provide a level of service that is agile, flexible and reacts quickly to our customers' changing needs.

As well as offering innovative and scalable products that promote customer profitability as a matter of course, keeping an eye on the future is vital. This is why we reinvest at least 10 per cent of our annual revenue into new research and development programmes.

We've produced this guide to give an overview of our range of products in the cornerstone technologies of access control, intrusion and video surveillance. If you were a customer of Security Products from Siemens, I'm certain that your experience of working with Vanderbilt will be an equally positive one.

Uniquely independent, at Vanderbilt we consider your success to be our success. I therefore hope you'll join me as we bring a refreshing perspective to an industry undergoing massive change.

Best wishes Joseph Grillo

About Vanderbilt

For over 30 years, Vanderbilt has grown with the security industry, establishing a global reputation for designing and manufacturing state-of-the-art security systems that are distributed across the world.

Our products range from simple single-user systems to highly customised applications, tailored to the changing needs of leading multi-national corporations. This flexibility gives them a vast customer base that includes banking, telecommunications, finance, manufacturing, healthcare, education, legal, accounting and government.

Vanderbilt's acquisition of Siemens Security Products puts the us in a unique position to incorporate Siemens respected, robust and

Vanderbilt - an evolution in European Security

integrated security products portfolio into our global manufacturing and distribution network.

That means the same expertise, the same trusted, yet innovative intrusion detection, video surveillance and access control products invigorated and driven to market by a security partner with a new dynamism and flexibility - a uniquely Independent partner for all your security needs.

Take a look at how European security has evolved, and let Vanderbilt products drive your next security installation.

Intrusion Detection Portfolio Overview

Access Control Product Portfolio – Security and accessibility in perfect harmony

Our access control portfolio consists of products and systems that ensure that the right people always have access to wrong people never do. Our access control needs. systems are also easy to integrate with our intrusion detection and video surveillance systems to create truly interoperable – from managing access at a single door security systems.

also been designed to provide a high level product or system to do the job. of convenience. As a result, our products are not only robust and reliable, they are also very easy to install, use and maintain.

All of our systems are both flexible and scalable, which means it's easy to modify or the right places at the right times, and the expand them at any time to meet changing ----

Whatever the customer's needs might be to overcoming the security challenges of large enterprises with thousands of doors While security is of utmost importance, our and cardholders – we are confident that access control products and systems have our access control portfolio offers the ideal

NTEGRATION WITH ACCESS PRODUCTS

Improved operational efficiency with centrally managed security and building management systems

NTEGRATION WITH VIDEO URVEILLANCE PRODUCTS

Improved out-of-hours security and evidence gathering with alarm triggered video recording

Video Surveillance Portfolio Overview

Our intrusion detection portfolio consists of systems and devices for detection & monitoring, control & operation, alarm transmission, alarm verification and remote services.

Both our SPC controllers and their wide range of system components such as keypads and expanders provide installers and end users with unmatched flexibility and scalability. They also offer a cost-effective design and installation concept. The innovative technology behind our wired and wireless detectors and contacts for perimeter and perimeter surveillance, room surveillance and object surveillance, as well as our alarming &

signaling devices, provide superior immunity and high detection reliability. Furthermore SPC is offering full remote access to security and maintenance functions via the on-board Web server or on a PC with SPC Pro and multipass communication.

Vanderbilt's intrusion detection products and systems are designed with both installer and end-user requirements in mind.

Easy integration with our SiPass integrated access control system ensures that full interoperability is built in as standard.

Interoperable security systems

Video Surveillance Product Portfolio – Full visibility around the clock

Our video surveillance portfolio is designed to complement our access control and intrusion detection portfolios. It consists of dome and boxed cameras (both with IP variants), lenses, digital video management systems, matrix systems, pan & tilt heads, housings and accessories. As with all Vanderbilt products, the latest manufacturing techniques are used to produce video surveillance equipment of exceptional quality.

Vanderbilt's video surveillance products and systems are designed with both installer and end-user requirements in mind. Easy integration with our SiPass integrated and SiPass Entro access control systems ensures that full interoperability is built in as standard. In addition to this, remote access via internet or smart phones is easily achieved to ensure you are always in control, even when you are on the move.

2222

VANDERBILT VISION

TO BECOME - the largest independent security products and systems provider in the world, offering a complete security products portfolio with considerable technological content.

TO GROW AND DEVELOP - our existing customer relationships and distribution networks with partners and installers internationally.

TO HELP - security professionals optimise revenue streams whilst improving customer productivity through out products' innate ease of installation, remote diagnostics and comprehensive technical support.

VANDERBILT VALUES

AGILITY – Ability to respond guickly and flexibly to customer requirements and market pressures, because as an SME our decision making process is short and focused.

COMMERCIAL FLEXIBILITY – Ability to ensure that our proposition fits a particular set of customer or market requirements.

DEPENDABILITY – We are a reliable partner, whose products you can count on today and tomorrow, backed by a multi-channel infrastructure designed to provide technical and commercial support.

TO DELIVER - superior levels of protection through a portfolio of security products that harness emerging technology to foresee and satisfy current and future security needs.

TO MAINTAIN - our comprehensive security pedigree that is based on over three decades of heritage in the Security Products Sector.

COMPATABILITY – Our products are designed for future-proof performance and backwards compatibility, along with relevant national approvals, open protocol software and international quality processes.

AMBITIOUS – Our determination ensures that we strive to provide a competitive, technically advanced range of products and systems that are easy to install, valued by end users and that add to our customers' success.

SECURITY - IT'S IN OUR DNA

Security is evolving. Vanderbilt strives to discover new ways to address physical threats and changing circumstances such as demographic movement, urbanisation, global warming, and resource shortages.

Efficiency is critical, but cannot come at the cost of security for personnel, property or assets. In addition, we need to be mindful of the effects our products and their development have on the environment.

For our customers, success is defined by how well we manage these challenges.
