

PRODUCT LINE: ACCESS

PRODUCT NAME: Cotag Technology

MODEL(S): All **CATEGORY:** PHASE OUT

CONTACT: Local Technical Support **DATE:** 2019-11-27

Cotag Technology, which has served the security market for over 30 years, is coming towards the end of its lifecycle. Due to decreasing global demand, our component suppliers have ceased to manufacture Cotag dies that are necessary to support this technology moving forward. Given the current run rate of active and passive Cotag credentials, we will be able to support this product portfolio for another two years, approximately.

We would also like to inform you of an upcoming price increase affecting all Cotag products that will become effective on **1 April 2020**. Your local Sales Manager will be in touch with detailed pricing information. All orders placed before 1 April 2020 will be honored with the current price.

This increase is a direct result of falling volumes and FX rates having a significant cost impact. Our suppliers are unable to absorb the continued erosion in their margins with component and material prices increasing.

We greatly appreciate your understanding and your continued business and support.

Cotag credentials:

Part number	Description	Type
VGBI:51-600	0911 Active Cotag Tag unprogr. (1pc)	Unprogrammed Cotag Cards
GBI:51-541	0928-U Active Cotag ISO unprinted & unprogr. (1pc)
