Eventys

Simple to setup video surveillance that will save you time and money

vanderbiltindustries.com

Eventys video surveillance systems ensure you can always connect to your business or property and provide the reassurance that it is safeguarded.

The HD video surveillance solution is easy to install, easy to connect, easy to store, and easy to view — allowing you to experience the true benefits and value that IP surveillance should offer.

Eventys at a glance:

Easy to choose

Eventys IP cameras are dust, water protection, shock and impact rated making them ideal for, and reliable in, the harshest of environments.

Easy to install

Eventys IP cameras are powered over the network directly from the NVR, resulting in reduced installation times and cost savings with no need for additional equipment.

Video Surveillance with Eventys is as simple as 1, 2, 3...

Pick your camera... ..choose an NVR... ..then Plug & Protect!

Easy to view

The Guarding Vision app is designed to allow you to view your cameras remotely. It offers both real-time and recorded video viewing, and can even send alarm notifications when motion detection alarms on your system are triggered!

Easy to record

Eventys NVRs offer one key recording, meaning the push of a single button can trigger continuous recording. Rest assured, when the system is not being monitored physically, intelligent motion detection and line-crossing behavior analysis will also record any suspicious activities.

Easy to store

Eventys NVRs have the latest recording technology, helping to reduce hard drive storage consumption by up to one third compared to traditional IP camera recording systems, meaning you get more recordings for longer periods of time.
