# Feenics

Feenics Active Directory Integration

Feenics Active Directory Integration allows users to synchronize data between Active Directory and Feenics.

ACRE™

Active Directory Integration

Feenics Active Directory Integration allows users to synchronize data between Active Directory and Feenics. The integration can extend to AD based systems including HR, CRM, and Financial systems. Feenics AD integration enables users to manage card assignments, badge types, and other important data within their Active Directory environment, rather than within Feenics.

Customer Network

| Active Directory | ←→ LDAP Protocol | Windows 10 IoT Feenics Embedded App | → Port 443 | Feenics — Public Internet |

Integration Requirements

✔ Feenics Data Synchronization License   ✔ Feenics embedded AD service

With Feenics AD integration, users have the ability to deactivate badges when employees are "disabled" in Active Directory. The AD Integration can leverage custom forms within Feenics to provide additional query capabilities within Active Directory, including employee IDs, training information, and buildings. These and other queries allow synchronization of any data entered via Feenics custom forms. Feenics AD Integration further allows users the flexibility to configure specific times and frequency for synchronization of data.

Feenics Direct Deployment of AD Integration Service

Feenics Active Directory integration requires access to the customer's local server by Feenics to ensure the security of the customer's network and the integrity of the data.

ACRE™

www.acre-int.com/feenics

Functionality

- Actively syncs fields based on intervals set by administrator
- Records disabled in AD disables same records in Feenics
- Records reactivated in AD are reactivated in Feenics upon next synchronization interval
- Maintain employee data across all systems
- Provides one data source of truth for audit success
- Import identification photos
- Share specialized data using custom forms
- Assign access based on values from Active Directory

ORDER INFORMATION	
Service	Annual
FN-KDS500	LDAP sync of 1-500 record holders
FN-KDS5K	LDAP sync of 1-5,000 record holders
FN-KDS10K	LDAP sync of 1-10,000 record holders
FN-KDS15K	LDAP sync of 1-15,000 record holders
FN-KDS20K	LDAP sync of 1-20,000 record holders
FN-KDS50K	LDAP sync of 1-50,000 record holders
Optional Services	
FN-KTAD Feenics Active Directory Integration Training	
FN-KADS LDAP/Active Directory Sync Services. Includes remote deployment assistance for installation.	

Always On, Never Out of Date

Software updates are automatic so your system is always up to date. No scheduled downtime is ever required.
