Feenics Alert for Mass Notifications Overview

Keeping personnel informed is critical. Any event or alarm can be pushed to one or more people via email or sms. However, Feenics takes alarm notifications an extra step by allowing push notifications to one person, groups or all. Messages can be custom created or derived from pre-built templates.

The image displays three screenshots of the Feenics mass notification interface. The top-left screenshot shows a 'Send Notification' dialog box with fields for 'Contact Method' (All Cardholders), 'Contact Type' (Email & SMS), 'Subject' (Lockdown), 'Message Type' (Template), 'Email Template' (Lockdown Procedure (Email)), and 'SMS Template' (Lockdown (demo purposes only)). The top-right screenshot shows a 'School Lockdown (demo purposes only)' message template with the text 'Potential incident outside of school #438. Lockdown procedures going into effect. (Feenics demo message)' and a 'Tags' field. The bottom-left screenshot shows another 'Send Notification' dialog box with 'Subject' (No Subject), 'Message Type' (Custom), and 'Message' (School will be closing early at 12 noon today due to approaching storm). The bottom-right screenshot shows a 'Mass Notification' form with fields for 'Contact Method' (All Card Holders), 'Contact Type' (Email), 'Subject' (Lockdown), 'Message Type' (Template), and 'Email Template' (Lockdown Procedure (Email)).

Use Feenics' Windows app, web client or mobile app to send mass notifications

Functionality

- ✓ Any alarm can be pushed to an email or SMS user (or multiple recipients) within the database.
- ✓ Manually script any message, and send to an individual, group or all records in the database.
- ✓ Choose delivery method as SMS, email, or SMS & Email combined.
- ✓ Create an unlimited number of pre-built message templates to be ready to send at a moment's notice.
- ✓ Associate a template message to be sent when 'lockdown' action is pushed.
- ✓ Mass notification capability is available with Feenics' Windows app, web client and the mobile app on either iOS or Android.
- ✓ Email and mobile app notifications are included with all versions of the instance.
- ✓ Additional charges may apply for SMS notifications based on monthly messages sent.
- ✓ Standard text rates applied from all carriers. Feenics is not responsible for any fees applied by local carrier.

ORDER INFORMATION

Service	Annual
