**CONTACT:** Local Technical Support

**DATE:** 2021-08-05

The SiWay personal alarm wireless button (Article Number: V54538-F107-A100) is reaching the end of life due to the availability of a critical component. There is enough stock to last approximately two years based on the current run rate. We are actively looking at a replacement product.

Further updates will be made during the life cycle and when the new information is available.
