**PRODUCT NAME:** OMNIS SYSTEM

**MODEL(S):** DALM3000/5000 alarm transmitters **CATEGORY:** UPDATE

**CONTACT:** Local Technical Support **DATE:** 2019-09-27

The DALM 3000VB and DALM 5000VB alarm transmitters in the 3G version are discontinued and upgraded with a module supporting the 4G network.

The switch to the 4G module does not mean that support for the 3G network is lost, but rather support for the 4G network is added.

Labels on the box and the PCB will tell if the unit is of the 3G or the 4G version.

Given standard run rates and current stock levels it is anticipated that the 3000VB version will be shipped in 4G version within 1-2 months and the 5000VB in about 6-8 months.
