PRODUCT LINE:	OMNIS		
PRODUCT NAME:	Omnis 7.1		
MODEL(S):	See below	**CATEGORY:**	RELEASE
CONTACT:	Local Technical Support	**DATE:**	2021-10-01

Vanderbilt is pleased to inform you about the sales- and delivery release of Omnis 7.1. **Omnis 7.1 Software** can be downloaded from our Webshop. A Base License for Omnis 7.1 is required for either updating the software from an earlier version or installing it for the first time.

What's new in Omnis?

A full list of new features and updates is available in the Release Notes and can be found on the Omnis Landing Page.

- **Change History (Audit Trail Comment)**
  A new field has been added for Operators to add comments when making system changes. The field appears when an Operator is attempting to save changes in select areas of Omnis configuration. The new Change History gives users better traceability over the changes occurring in the system over its lifecycle.

- **Recent Events for User**
  It is now possible to see the events of a specific User directly from the "Definition of User"-window. The new feature makes it easier for Operators to support Users in need of assistance, by looking up the specific User directly from the User Registry.

- **Log Report Enhancements**
  The Log Report has received a series of improvements to ease the

- SR35iA: Support for Aperio AH30 Gen5 Hubs
  Compatibility tested in versions 7.0 and 7.1.

- Bug Fixes

How to upgrade?

There are different options for upgrading to Omnis 7.1, depending on the version. Once upgraded, any eventual Service Packs for version 7.1 will continue to be included regardless of upgrade path.

From version 7.0

- **With a valid ULA**: Omnis 7.1 is included in all ULA's valid on 2021-09-30, following regular activation process.

- **Purchasing new ULA**: New ULA's will include Omnis 7.1. The validity period of the ULA will begin retroactively from the creation date for the original Omnis 7.0 license.

- **One-Time Upgrade**: A one-time upgrade from Omnis 7.0 to 7.1. An additional license will have to be purchased to move from version 7.1 to any newer versions.

From version 6.x or older?
- **New license**: Any versions 6.x or older will need a new version 7.x base license. See below

A – Order information
See tables below for lists of Base Licenses, upgrades and extensions for more concurrent users.

B – Product description

Base Licenses

Product name	Order number	Product Description
Vanderbilt Omnis 1 User	VGBI:10661	RB-ACC is the software for Vanderbilt Omnis and it is a powerful tool for installation and administration of the system. The software is installed on a standalone PC that is connected directly to the Omnis hardware, or on a server with a server software. With the software, all settings can be performed, and the hardware is easily installed in the LON network. RB-ACC handles functions such as intrusion alarm, access control, fire detection, assault alarm, operation alarms, lighting control, time distribution, logical functions, graphics and card production.
