

PRODUCT LINE: ACCESS

PRODUCT NAME: OMNIS

MODEL(S): Omnis PSU Large

CATEGORY: RELEASE

CONTACT: Local Technical Support

DATE: 2020-06-17

The current Omnis PSUs have a cabinet size allowing for 2*20Ah batteries. A new, larger cabinet is available that allows for 2*45Ah batteries. The 5, 10, and 25A variants of the Omnis PSUs are all planned to move to the larger cabinet size. The 15A Omnis PSU will stay as-is.

The Omnis PSU 5A Large is now released for sales. The 10 and 25A variants will be issued once the current stock is depleted. We are anticipating having stock of the 5A Large PSU in week 27.

- The Omnis PSU Large range is SBSC certified only.
- If EN50131 certification is required, then the 15A variant can be used, which carries both EN50131 and SBSC certificates.
- The PSUs will have FW version 1.3, which is the version needed for the soft integration to the E100 central controller via OSDP.
- Note that the FW for the E100 supporting the integration is yet to be released.
