<b>PRODUCT NAME:</b>	RB500-Cotag & RB500-EM reader		
<b>MODEL(S):</b>	VGBI:21-512, VGBI:21-511	<b>CATEGORY:</b>	PHASE OUT
<b>CONTACT:</b>	Local Tech Support	<b>DATE:</b>	12-02-2018

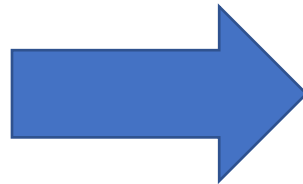

To streamline our card reader portfolio, the RB500-Cotag & RB500-EM readers will be discontinued and replaced with the PP500-Cotag & PP500-EM readers. The following characteristics will be added to the PP500 to close the feature gap between these products:

- Added rivets to the bottom of the reader
- Added transistor for the card presence signal when in Clock & Data mode
- Updated installation manual to show how to switch the default communication from BC-LINK to Clock & Data
