

**PRODUCT LINE:** ACCESS

**PRODUCT NAME:** OMNIS

**MODEL(S):** Milestone integration

**CATEGORY:** RELEASE

**CONTACT:** Local Technical Support

**DATE:** 2019-08-13

An integration between Omnis and Milestone is now available. In short, the integration enables control and video verification of the Omnis system via the Milestone Smart Client. This means the Milestone UI is used and Omnis is the subordinated system.

Both a license in Omnis and one in Milestone is required. Vanderbilt only provides the license for Omnis. The Milestone license and installation package has to be retrieved from Milestone.

The integration requires Omnis 6.3 SP3 or later. The integration, along with documentation, should be publicly available on Milestone Marketplace in the next couple of days.
