**PRODUCT NAME:** ACT365 Portal

**MODEL(S):** 1.1.64

**CATEGORY:** UPDATE

**CONTACT:** Local Technical Support

**DATE:** 2019-02-08

The ACT365 Portal 1.1.64 includes an enhanced the ACT365 API to return log events sorted in an ascending or descending order.

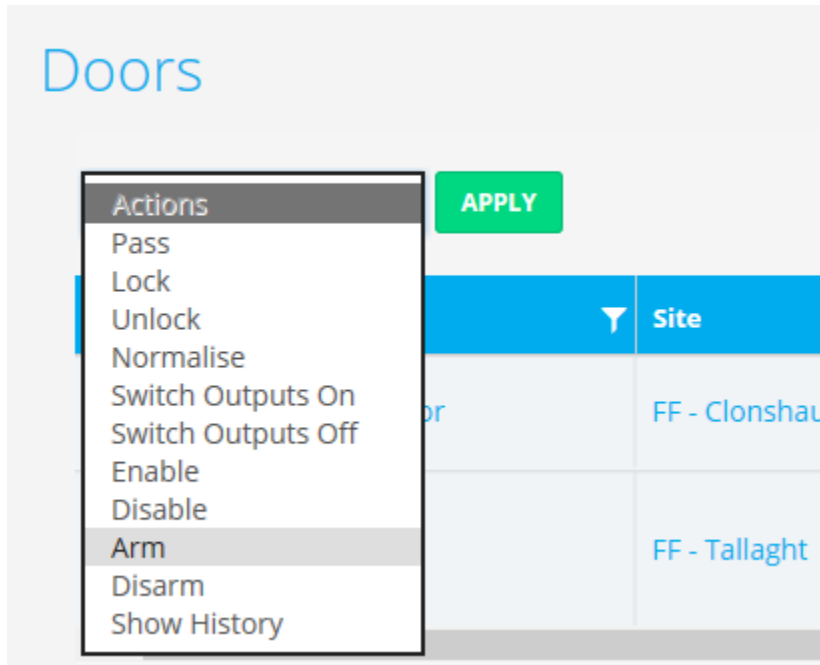

**1. Persistent column selections on cardholder list:**

Order the column as required and press “SAVE COLUMNS” to save the column layout. The saved layout is stored on the web browser cache. Clearing the browser cache will clear layout.

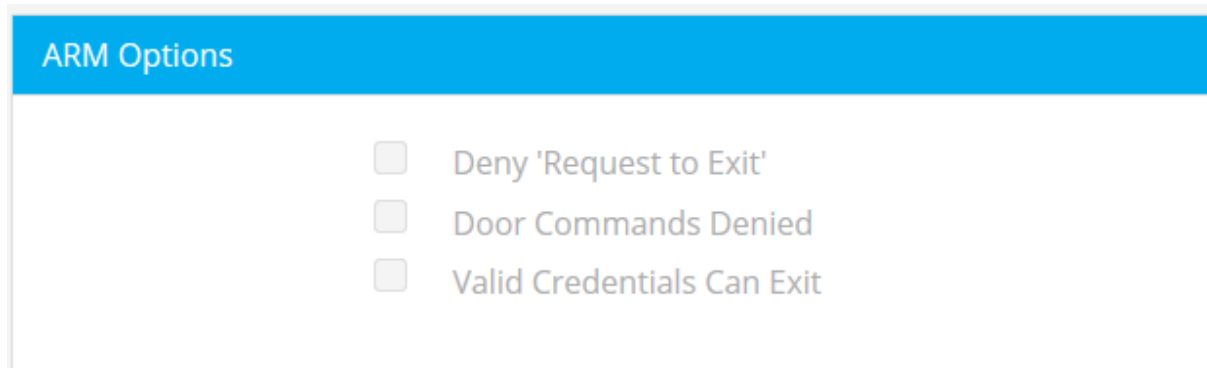

Name	Enabled	Managed By Site	ExternalID	Card1	Card2	First Group	Second Group	Is Valid	History
<input type="checkbox"/> Johnny Bravo	✓	FF - Clonshaugh	0	10012504		Roaming CHG		✓	Door tallaght 14:40:43
<input type="checkbox"/> Name 2 Surname 2	✓	FF - Clonshaugh	2			Roaming CHG	Full Access To FF - Clonshaugh	✓	

**2. Enhancement to Arm/Disarm intruder panel:**

See intruder panel wiring on how-to wire ACT365 ACU to intruder panel. This allows selected cardholders to arm or disarm the intruder panel. In the door selection, it is possible from the ACT365 portal to Arm/Disarm the intruder panel and arm multiple zones simultaneously.

It is possible to deny door commands while the intruder panel is set. This allows valid (authenticated) users to exit the area.

**3. Allow companies from non-EU countries signup for ACT365 portal account:**

Previously companies outside the EU could not automatically signup for an ACT365 account. This restriction was centered around the VAT number format.

**4. Bug with exporting T&A reports resolved:**

A bug was introduced to the ACT365 Portal whereby the T&A export did not export the T&A information. This has now been resolved.
