

PRODUCT LINE: ACCESS

PRODUCT NAME: Omnis

MODEL(S): E100 Central Controller **CATEGORY:** FUNCTIONALITY

CONTACT: Local Technical Support **DATE:** 2019-03-01

The E100 and E100-S Central Controller now support the VR40S-MF reader to be used as a keypad when connected to it. In terms of functionality, the VR40S-MF matches the E4 keypad.

To be able to utilize the VR40S-MF reader as a keypad, the E100 or E100-S has to have FW 7.3.2 or later. This firmware is available as a download from the Vanderbilt webshop or Technical Support. The VR40S-MF has to have FW 2.003.021 or later. This is the current standard firmware for the reader. Therefore, there is no need for a firmware change in the reader for it to work as a keypad.

Documentation explaining the installation and configuration in more detail is available on the Vanderbilt webshop.
