

PRODUCT TYPE:	INTRUSION		
PRODUCT NAME:	GSM Module incl. Antenna		
MODEL(S):	SPCN310.000 SPCN320.000	CATEGORY:	PHASE OUT / PRODUCT REPLACEMENT
CONTACT:	Local Support Team	DATE:	14 th March 2017

Due to component obsolescence issues, the SPCN310 will be phased out, and immediately replaced by the SPCN320.

Stock and ordering situation:

Based on current run rates, all stock of the SPCN310 will be depleted by the end of March. Once depleted, the SPCN320 will be available to order using the following order code: **V54550-B102-A200**. The SPCN320 is expected to be on stock in the last week of March.

Product Details:

This modem is a direct replacement for the existing modem, providing 2G GSM communication to the SPC system. 3G functionality, and additional features will be available via firmware upgrade with the future release of SPC Firmware V3.8.

Approvals:

The SPCN320 modem is currently being tested to EN and VdS standards. Unfortunately, this product will not be approved upon release. Product line are working to expedite this testing to obtain the necessary approvals, and will provide an update on this topic as soon as possible.
