

**PRODUCT LINE:** Intrusion

**PRODUCT:** SPC Milestone Plugin

**MODEL:** SPC Milestone Plugin      **CATEGORY:** Product Update

**CONTACT:** Local Tech Support      **DATE:** 06-02-2018

The SPC Milestone plugin allows users to trigger off events and control SPC systems from within the Milestone system. When installed the plugin allows for a 30-day trial for up to 2 panels and will allow the display of areas, zones, doors and outputs from the SPC system. The plugin uses FlexC to communicate with the panel and when a license is purchased from Vanderbilt will support up to 20 SPC systems. The license also provides customers with 1-year support and availability to updates. The plugin will be available from Vanderbilt from February 6, 2018.

The update to the plugin enhances the live status for zones, areas and doors and will also allow the triggering of actions on the SPC from the Milestone system.

The plugin is available from: <http://van.fyi?Link=milestonespc>

The plug-in is compatible with SPC 3.6.6, 3.7.1 and SPC 3.8.
