

PRODUCT LINE: INTRUSION

PRODUCT NAME: SPC

MODEL(S): 3.8.1

CATEGORY: Product update

CONTACT: Local Technical Support

DATE: 2017-06-30

A new firmware release for SPC, 3.8.1, is now available. SPC 3.8.1 builds on the recent major release 3.8.0 and includes some minor updates. SPC 3.8.1 supersedes 3.8.0.

SPC 3.8.1 enhancements focus on reducing installation times. The new functionality allows engineers to quickly configure calendars, implement cause and effect, and easily import and edit logos. In addition, there have been enhancements to user, zone, and keypad options. The help menu on the SPC panel webpage has been updated to aid with the set-up of SPC 3.8.1 panels.

SPC 3.8.1 also provides support for 3G modem communication, when used with the SPCN320 modem.

Full details of updates and enhancements are available in the SPC 3.8.1 data pack. The 3.8.1 data pack will be available from June 30th, 2017 from Vanderbilt Support and on SPIAP from July 3rd, 2017.
