MODEL: Android V1.06

CATEGORY: RELEASE

CONTACT: Local Tech Support

DATE: 29-05-2018

Vanderbilt is pleased to announce the release of SPC Connect Android V1.06. The new app provides SPC Connect system users with many enhancements that will expand the service offering to end customers. The Android app will be released to the Play Store on the 1 June 2018. Updates will then start to appear on customer devices.

Key Features:

- For customers who have cameras or audio devices connected to their SPC, you can now talk and listen to site and/or view images live from site. Should an alarm occur, you will also be able to view the video and/or audio at the time of the alarm. This information can be stored and exported. Contact your installer for more details.
- Staying connected: Vanderbilt work in cooperation with your installation company to offer services and to ensure your system is serviced and protected. Information from your security company will now be available from within the SPC Connect mobile application.
- Layout change: Accessing Push Notification settings is now more intuitive. Accessible from 'Settings' -> 'Panels' menu.
- Data protection in compliance with GDPR requirements: The data protection policy for the SPC Connect service has been enhanced to clarify your rights, and how we use your data. This is available from Terms and Conditions
- General bug fixes/improvements

Please note:

Push notification is not a substitute for professional monitoring. Vanderbilt cannot guarantee the delivery of push notifications.
