CONTACT: Local Support

DATE: 6/3/2017

The SPC Connect V2.3 Release provides updates for both installer and end user.

For installer services, your company account will be enhanced with the ability to audit the actions taken in your company. **For system users,** the web page is enhanced with a new overview when an alarm occurs, providing all relevant information to handle the alarm.

In general, customers can now use SPC 3.8 with SPC Connect for configuration manager and use the next functions within SPC 3.8. The SPC Connect performance has been increased to improve available and downtime performance.
