

PRODUCT TYPE: INTRUSION

PRODUCT NAME: SPC

MODEL(S): 3.8

CATEGORY: Product update

CONTACT: Local tech support

DATE: 2017-05-08

The SPC intrusion system has been improved with new features and enhancements. The latest update to SPC 3.8 provides engineers with enhancements that focus on shortening installation time, and functions to quickly and easily configure calendars, cause and effect, and logo configuration. The system also enhances the SPC intrusion and access functionality with additional user, zone, and keypad options.

We are also working to enhance SPC help and support. This includes material to aid in the setup of SPC 3.8 panels. The help section on SPC panels has also been enhanced to offer installers more detail and information.

SPC 3.8 also provides support for 3G modem communication, when used with the **SPCN320** modem.

The SPC 3.8 is a major update for SPC and full details of the enhancements are available within the SPC 3.8.0 data pack. This data pack will be available from the 10th May 2017 from Vanderbilt Support and on SPIAP from the 1st June 2017.
