CONTACT: Local Technical Support

DATE: 2018-10-8

SPC 3.9.1 is now released. This is a service release update to SPC 3.9.0. This will be available to [download here](#) on 12 October 2018.

Please note, the standard firmware delivered on SPC systems will continue to be SPC 3.8.5. SPC 3.9.1 is an interim firmware and does not have external approvals. For regional approved firmware, please use SPC 3.8.5.

SPC 3.9.1:

- Allows for the bypass of tamper signals from wireless devices
- Addresses issue on access log
- Addresses issue with walk test and wireless devices

More details are available in the [release notes](#).
