

PRODUCT TYPE: VIDEO

PRODUCT NAME: Vanderbilt mid-range cameras

MODEL(S): 1035 & 2035 series

CATEGORY: New Firmware

CONTACT: Tech Support

DATE: 2017-05-19

Vanderbilt’s mid-range IP cameras 1035 and 2035 series have new firmware with an important feature: H.264+ codec. This feature can reduce the bandwidth load by 40%. This new feature is only usable for the combination of Vanderbilt mid-range IP cameras and Vectis iX NVR / NVS systems.

The firmware update for existing CCMW2035 adds new VCA functionality: Object Counting, Loitering, Take Away, and Abandoned Objects (for indoor usage, uncrowded areas). All firmware is ready for download free of charge via our Vanderbilt Internet Product Homepage.
