

PRODUCT LINE: ACCESS

PRODUCT NAME: Omnis

MODEL(S): AD integration

CATEGORY: RELEASE

CONTACT: Local Technical Support

DATE: 2019-06-25

An integration between Omnis and Microsoft AD is now available. In short, the integration enables import of users from AD into Omnis and keeps the status of the users synchronized.

Note, the integration is unidirectional. This means that Omnis will never try to change or update the AD. The integration is setup and configured via an external application. It is licensed per 100 users that are to be synchronized. Both the installation package and documentation are available as a download from Vanderbilt’s homepage.

The integration requires Omnis 6.3 SP3 or later.
