

PRODUCT LINE: INTRUSION

PRODUCT: SPC

MODEL: SPC OnGuard Plugin **CATEGORY:** NEW PRODUCT

CONTACT: Local Technical Support **DATE:** 2021-07-26

The SPC plugin for the OnGuard software product series is now available. The SPC OnGuard plugin allows users to trigger off events and control SPC systems from within the OnGuard system. When installed, the plugin allows for a 30-day trial for up to 1 panel and will allow the display of areas, zones, doors, and outputs from the SPC system.

- View and change the status of an SPC intrusion area (arm/disarm)
- View and change the status of an SPC intrusion zone (bypass/unbypass)
- Receive alarm events in OnGuard Alarm Monitoring from the SPC intrusion system (restore alarm)
- View and change the status of an SPC intrusion output (setRelay on/off)
- Monitor the status of a door and change the status of a door (unlock, momentary, lock, normal)
- Alarm control: view/monitor/restore a pending alarm on a zone of the intrusion system

The plugin uses Vanderbilt’s FlexC IP-based protocol to communicate with the SPC panel. The license will support up to 5 SPC systems per license also provides customers with 1-year support and updates.

The plugin will be available from Vanderbilt from 26 July 2021. Vanderbilt’s plugin to the OnGuard system is compatible with all SPC IP-based intrusion systems with Firmware 3.8.5 or later. It is supported by OnGuard software version 7.5 and 7.6.
