

## Our Philosophy

We have been at the forefront of innovative security technologies ever since our first security product was launched over 30 years ago. We have become a market leader in electronic security, which encompasses Access Control, Video Surveillance and Intrusion Detection. Our security solutions offer the ultimate tools in alarm response and management, evidence recording and crime prevention. It is this expertise we are now looking to bring to the security professionals worldwide, and our Training Center underlines our commitment to providing customers with the information and technology they need to meet their specific security requirements.

### The Trainers

Our trainers provide you with the knowledge and the confidence in our products that is clearly required today. They are all specialists in their field with many years of experience.

### The Courses

Our training courses have been designed to offer delegates a rare insight into the technical and visionary concepts of the security industry, and enable security professionals to:

- ✓ Increase their service level to customers
- ✓ Get real insight into new technology
- ✓ Benefit from expert advice on system integration
- ✓ Increase their expertise in modern security systems
- ✓ Get real hands-on experience with our latest security products

All courses are held in our Training Center in Karlsruhe - Neureut and include lunch and refreshments. Breaks in the morning and the afternoon enable time for phone calls and emails in order to ensure uninterrupted training. All courses start at 9:00 and end at 17:00.

### How we train

Each section of our training courses combines theory and hands-on practical sessions. At the end of each training course, the delegates' knowledge is tested to ensure the minimum level of understanding has been achieved, and a certificate is provided to state that they have completed the course.

### Customized offerings

We can also deliver customized courses that focus on other products in our current portfolio in order to meet your specific requirements.

### Hotel support

Hotel accommodation can be reserved on request. The reservation information will then be sent to you with details on how to confirm and guarantee your accommodation directly with the hotel.

### Booking

In order to book a course, visit the Training pages on our website and select a course topic. The course description page includes an online registration form that we kindly ask you to use. Should you need to apply for a Visa, please add all necessary information in the comments field on your registration

The information in this document contains general descriptions of technical options available, which do not always have to be present in individual cases. The required features should therefore be specified in each individual case at the time of closing the contract.

Boost your technical knowledge!

# International Training 2018

## Training schedule

### INTRUSION DETECTION

- ✓ SPC  
12.03.2018 – 13.03.2018  
25.06.2018 – 26.06.2018  
22.10.2018 – 23.10.2018

### ACCESS CONTROL

- ✓ SiPass® integrated  
13.03.2018 – 15.03.2018  
26.06.2018 – 28.06.2018  
23.10.2018 – 25.10.2018
- ✓ Aliro  
Courses on demand
- ✓ SiPass integrated\* Advanced  
Courses on demand
- ✓ SiPass Entro  
(2-day course, subjects according to agreement)  
Courses on demand
- ✓ Aliro standard  
Courses on demand

### VIDEO SURVEILLANCE

- ✓ Vectis iX range  
Courses on demand

### VIDEO SURVEILLANCE & ACCESS CONTROL

- ✓ ACT - Eventys solutions (for Video and Access)  
16.03.2018  
29.06.2018  
26.10.2018

Training will be hosted in the Vanderbilt Training Center at 76149 Karlsruhe - Neureut, Germany. Other locations can be offered as customized options.

You will find more information about the course prerequisites and what they entail on our website.

#### ✓ SiPass integrated

SiPass integrated training is a 2,5-day course. This course benefits from previous Access Control knowledge.

#### The trainee will be able to:

- know the whole SiPass integrated portfolio and its functions
- install, update and configure the SiPass integrated system
- define functions like inter-locking, dual custody, guard tool and visitor handler
- use and understand time plans, access levels and access groups
- configure alarm classes, graphic functions, and event tasks
- create reports and evaluations with the „Explorer“ function

(\* A product made by Siemens AG)

#### ✓ SPC

SPC training is a 1,5-day course. The course benefits from some previous knowledge of Intrusion.

#### The trainee will be able to:

- know the whole SPC portfolio and its functions
- commission a simple SPC 6000 control panel
- understand the difference between the engineering tools
- operate card readers with the basic door management functions
- enroll wireless detectors and understands its technology
- use the Cause & Effect possibilities

#### ✓ ACT – Eventys solutions

ACT – Eventys solutions is a 1-day course. The training provides base-level technical information and programming knowledge about the Eventys Video surveillance system and ACT365 / ACTpro system.

#### The trainee will be able to:

- know the Eventys product range and ACT portfolio
- configure Eventys and ACT365 / ACTpro / ACT Cloud
- know the Eventys Guarding Vision – remote connectivity
- understand the cloud solution
- learn about Eventys IP/analog solution
- learn about Eventys-ACT – solution and about Eventys-SPC - solution

#### ✓ Vectis iX range

Vectis iX training is a 2-day course. The training includes core-level information and programming knowledge about the Vectis iX Range.

#### The trainee will be able to:

- understand the different recording possibilities
- configure and commission a Vectis iX system
- calculate the necessary bandwidth within an IP network
- distinguish the communication possibilities
- learn about the integration of the mobile app
- be acquainted with the integration of IP cameras

#### ✓ Aliro

Aliro training is a one day course. The course entails learning about the portfolio and how to use the system to its full potential.

#### The trainee will be able to:

- understand the Aliro systems construction and its functions
- design an Aliro system
- know the Aliro hardware and its purpose
- wire and set up Vanderbilt card readers
- use the card layout creation and printing functionality
- learn about the system requirements, capacities and compatibility

#### ✓ SiPass integrated Advanced

SiPass integrated Advanced training is a 3-day course that requires previous completion of the SiPass integrated base training.

#### The trainee will be able to:

- understand the advanced possibilities of SiPass integrated
- configure advanced hosts and controllers
- implement the OPM module with elevator control function
- define and connect the SPC intrusion system
- use the Mifare card encoding modules and configure Mifare card readers
- program and connect the Vectis iX ranges
