

Our Philosophy

We have been at the forefront of innovative security technologies ever since our first security product was launched over 30 years ago. We have become a market leader in electronic security, which encompasses Access Control, Video Surveillance and Intrusion Detection. Our security solutions offer the ultimate tools in alarm response and management, evidence recording and crime prevention. It is this expertise we are now looking to bring to the security professionals worldwide, and our Training Center underlines our commitment to providing customers with the information and technology they need to meet their specific security requirements.

The Trainers

Our trainers provide you with the knowledge and the confidence in our products that is clearly required today. They are all specialists in their field with many years of experience.

The Courses

Our training courses have been designed to offer delegates a rare insight into the technical and visionary concepts of the security industry, and enable security professionals to:

- ✓ Increase their service level to customers
- ✓ Get real insight into new technology
- ✓ Benefit from expert advice on system integration
- ✓ Increase their expertise in modern security systems
- ✓ Get real hands-on experience with our latest security products

All courses are held in our Training Center in Karlsruhe - Neureut and include lunch and refreshments. Breaks in the morning and the afternoon enable time for phone calls and emails in order to ensure uninterrupted training. All courses start at 9:00 and end at 17:00.

How we train

Each section of our training courses combines theory and hands-on practical sessions. At the end of each training course, the delegates' knowledge is tested to ensure the minimum level of understanding has been achieved, and a certificate is provided to state that they have completed the course.

Customized offerings

We can also deliver customized courses that focus on other products in our current portfolio in order to meet your specific requirements.

Hotel support

Hotel accommodation can be reserved on request. The reservation information will then be sent to you with details on how to confirm and guarantee your accommodation directly with the hotel.

Booking

In order to book a course, visit the Training pages on our website and select a course topic. The course description page includes an online registration form that we kindly ask you to use. Should you need to apply for a Visa, please add all necessary information in the comments field on your registration

The information in this document contains general descriptions of technical options available, which do not always have to be present in individual cases. The required features should therefore be specified in each individual case at the time of closing the contract.

Courses on demand

✓ SiPass integrated base

SiPass integrated training is a 2,5-day course. This course benefits from previous Access Control knowledge.

The trainee will be able to:

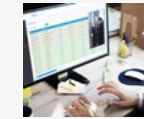

- know the whole SiPass integrated portfolio and its functions
- install, update and configure the SiPass integrated system
- define & configurate antipass back areas
- use and understand time plans, access levels and access groups
- configure alarm classes, graphic functions, and event tasks
- create reports and evaluations with the „Explorer“ function

Training will be hosted in the Vanderbilt Training Center at 76149 Karlsruhe - Neureut, Germany. Other locations can be offered as customized options.

You will find more information about the course prerequisites and what they entail on our website.

(* A product made by Siemens AG)

✓ ACT

ACT is a 1-day course. The training provides base-level technical information and programming knowledge about ACT365 and ACT Enterprise.

The trainee will be able to:

- know the ACT portfolio
- configure ACT365 / ACTpro / ACT Cloud
- learn about Eventys-ACT – solution and about Eventys-SPC - solution

✓ SPC

SPC training is a 1,5-day course. The course benefits from some previous knowledge of Intrusion.

The trainee will be able to:

- know the whole SPC portfolio and its functions
- commission a simple SPC 6000 control panel
- understand the difference between the engineering tools
- operate card readers with the basic door management functions
- enroll wireless detectors and understands its technology
- use the Cause & Effect possibilities

✓ SiPass integrated Advanced

SiPass integrated Advanced training is a 3-day course that requires previous completion of the SiPass integrated base training.

The trainee will be able to:

- understand the advanced possibilities of SiPass integrated
- configure advanced hosts and controllers
- implement the OPM module with elevator control function
- define and connect the SPC intrusion system
- use the Mifare card encoding modules and configure Mifare card readers
- program and connect the Vectis iX ranges
