

Our Philosophy

We have been at the forefront of innovative security technologies ever since our first security product was launched over 30 years ago. We have become a market leader in electronic security, which encompasses Access Control, Video Surveillance and Intrusion Detection. Our security solutions offer the ultimate tools in alarm response and management, evidence recording and crime prevention. It is this expertise we are now looking to bring to the security professionals worldwide, and our Training Center underlines our commitment to providing customers with the information and technology they need to meet their specific security requirements.

VANDERBILT

How we train

Each section of our training courses combines theory and hands-on practical sessions. At the end of each training course, the delegates' knowledge is tested to ensure the minimum level of understanding has been achieved, and a certificate is provided to state that they have completed the course.

Customized offerings

We can also deliver customized courses that focus on other products in our current portfolio in order to meet your specific requirements.

Booking

In order to book a course, visit the Training pages on our website and select a course topic. The course description page includes an online registration form that we kindly ask you to use.

The information in this document contains general descriptions of technical options available, which do not always have to be present in individual cases. The required features should therefore be specified in each individual case at the time of closing the contract.
