Save time and money with contactless access control ...

Our latest special promotion offers customers 20 FREE credentials with BLUE-A and BLUE-C readers purchased using the special partcodes listed below until 31st December 2020. Why not take advantage of this and try out our new and exciting cloud-based VCredential platform!

VCredential is a cloud-based credential management platform that offers users the ability to create and manage Bluetooth credentials independent of the access control platform.

VCredential's key benefit focuses on intuitive usability and the opportunity to benefit from the latest industry technology trends.

Through VCredential, all Vanderbilt systems, including ACTpro, OMNIS, ACT365, SPC, as well as multiple third-party partner systems, such as SiPass integrated, support Bluetooth Low Energy readers and accessories.

Moreover, following a global pandemic, virtual credentials have never been more apparent or needed. As such, virtual credentials will provide end-users with a seamlessly smooth user experience.
